

Thermally Modified Timber Profiles

Thermory's thermally modified timbers offer a range of natural or pre-finished, ready to install, cladding, lining, screening and decking solutions. Featuring spruce, pine and ash ranges that are responsibly sourced from sustainably grown forests. They are thermally modified using heat and steam to produce a durable, high performing product that carries a Class 1 or Class 2 durability rating to perform for decades in Australian conditions.

Thermory modifies the timber for increased durability and dimensional stability in an innovative range of beautiful exterior and interior wood solutions.
